## Summary

---

Frontend Software Engineer and Computer Science graduate combining strong algorithmic precision from competitive programming with modern web technologies. Specialized in building responsive, scalable, and user-centric web applications. Seeking to leverage problem-solving expertise and technical skills to contribute to innovative frontend projects.

## Education

---

### Suez Canal University Ismailia, Egypt

Bachelor's degree, Computer and Information Sciences.

Oct 2022 – May 2026

- **Graduated:** 2026
- **Grade:** Very Good

## Skills

---

- **Programming Languages:** C/C++, JavaScript, Python.
- **Frontend Technologies:** HTML, CSS, React, Next.js, Tailwind CSS, Bootstrap, PIXI.js.
- **Technical Skills:** OOP, Algorithms, Data Structures, CP, Problem Solving, Competitive Programming.
- **Tools:** Git, GitHub, GitHub Actions.
- **Soft Skills:** Communication, Collaboration, Adaptability, Leadership, Flexibility, Decision Making.
- **Spoken Languages:** Arabic (Native), English.

## Projects

---

### JobFit (Graduation Project A+)

[GitHub Repo](#)

- **Architected** an AI-driven recruitment and assessment platform to streamline technical evaluations and live candidate monitoring.
- **Developed** reusable Next.js interfaces following a futuristic minimalist design system, managed global workspace states, integrated AI evaluation workflows, and resolved critical UI bugs.
- **Tech Stack:** React, Next.js, TypeScript, Tailwind CSS, Supabase, AI Integration.

### Maze of Death

[Github Repo](#)

- **Created** a real-time multiplayer 2D maze shooter featuring custom high-performance canvas rendering.
- **Programmed** client-side interactions and game pages with full mobile responsiveness, leveraging PIXI.js for 60fps rendering and custom touch controls.
- **Tech Stack:** PIXI.js, JavaScript, WebSockets, HTML/CSS.

### Collaborative Online Editor

[Github Repo](#)

- **Built** a real-time collaborative text editor supporting room-based sessions and live multi-user synchronization.
- **Designed** the complete frontend interface and integrated Socket.IO event handlers to manage live room connections and real-time text updates.
- **Tech Stack:** Node.js, Socket.IO, JavaScript, HTML/CSS.

- **Constructed** a comprehensive desktop application for bookstore administration to automate inventory, user tracking, and billing.
- **Designed** an intuitive graphical user interface using Tkinter, built the complete 'Manage Books' module, and integrated backend database transactions.
- **Tech Stack:** Python, Tkinter, SQLite.

## Achievements

---

- **ECPC Competitor:** Achieved 127th place out of 230 teams in the prestigious ICPC Regional Qualifier Competition (ECPC). [Certificate](#)
- **Harvard University:** CS50 (Introduction to Computer Science). [Certificate](#)
- **CS50 Final Project:** Ranked among the Top 10 projects in the Information Technology Institute CS50 course. [Certificate](#)
- **Frontend Web Development:** Completed the Frontend Web Development certificate from the Information Technology Institute. [Certificate](#)
- **Advanced Frontend:** Gained the Advanced Frontend Web Development using React JS certificate from the Information Technology Institute. [Certificate](#)
- **Meta Front-End Developer:** Earned the Meta Front-End Developer Professional Certificate on Coursera. [Certificate](#)
- **Codeforces Specialist:** Achieved Specialist rank on Codeforces, demonstrating strong problem-solving skills. [Profile](#)
- **AtCoder Green Rank:** Reached Green Rank with a competitive rating of 1066 on AtCoder. [Profile](#)
- **LeetCode:** Attained a Contest Rating of 1617 (Top 21%) and earned multiple consistency badges (365-Day, 200-Day, 100-Day, 50-Day, and monthly badges). [Profile](#)
- **HackerRank Badges:** Obtained the Gold Badge in **C/C++** and the Gold Badge in Problem Solving. [Profile](#)

## Experience

---

### Volunteer HR Committee Lead | [Mish Hackers Team](#)

Jan 2024 – May 2026

- **Directed** a 25-member HR team, progressing from Member to Head, leading recruitment and engagement initiatives across a 200+ member organization.
- **Improved** internal communication and cross-functional operations efficiency by **30%** through streamlined onboarding and team-building processes.

### Volunteer Mentor | [ICPC Community](#)

July 2023 – Feb 2026

- **Mentored** over 50 participants in competitive programming, providing targeted guidance on advanced data structures and algorithmic problem-solving techniques.
- **Facilitated** 10+ technical workshops and community events, promoting collaborative learning and boosting team problem-solving performance.
