Summary

Frontend Software Engineer and Computer Science graduate combining strong algorithmic precision from competitive programming with modern web technologies. Specialized in building responsive, scalable, and user-centric web applications. Seeking to leverage problem-solving expertise and technical skills to contribute to innovative frontend projects.

Education

Suez Canal University Ismailia, Egypt

Bachelor's degree, Computer and Information Sciences.

Oct 2022 – May 2026

- **Graduated:** 2026
- **Grade:** Very Good

Skills

- **Programming Languages:** C/C++, JavaScript, Python.
- **Frontend Technologies:** HTML, CSS, React, Next.js, Tailwind CSS, Bootstrap, PIXI.js.
- **Technical Skills:** OOP, Algorithms, Data Structures, CP, Problem Solving, Competitive Programming.
- **Tools:** Git, GitHub, GitHub Actions.
- **Soft Skills:** Communication, Collaboration, Adaptability, Leadership, Flexibility, Decision Making.
- **Spoken Languages:** Arabic (Native), English.

Projects

JobFit (Graduation Project A+)

[GitHub Repo](#)

- Architected a recruiter dashboard to generate technical assessments, track live integrity metrics, and evaluate candidate performance leveraging AI.
- Managed the dark mode infrastructure and styling components, resolving UI alignment issues across recruiter and applicant views to ensure a seamless testing sandbox.
- Technologies: React, Next.js, Tailwind CSS, JavaScript, AI Integration.

Maze of Death

[Github Repo](#)

- Programmed the client-side of a live multiplayer gaming experience in a team environment, focusing on real-time interactions and dynamic rendering.
- Refactored CSS for mobile responsiveness and implemented precise mobile UI controls to optimize seamless in-game visual interactions.
- Frontend Technologies: PIXI.js, JavaScript, HTML, CSS, WebSockets.

Collaborative Online Editor

[Github Repo](#)

- Collaborated on a real-time team project, engineering the interactive text editor interface to facilitate instant data exchange.
- Integrated seamless live synchronization within a multi-user, room-based document editing architecture.
- Core Technologies: Node.js, Socket.IO, JavaScript, HTML, CSS.

- Created a comprehensive desktop application using Python to streamline the management of books, users, and orders.
- Designed an intuitive graphical interface via Tkinter to efficiently handle inventory tracking, billing processes, and underlying database transactions.

Achievements

- **ECPC Competitor:** Achieved 127th place out of 230 teams in the prestigious ICPC Regional Qualifier Competition (ECPC). [Certificate](#)
- **Harvard University:** CS50 (Introduction to Computer Science). [Certificate](#)
- **CS50 Final Project:** Ranked among the Top 10 projects in the Information Technology Institute CS50 course. [Certificate](#)
- **Frontend Web Development:** Earned the Frontend Web Development certificate from the Information Technology Institute. [Certificate](#)
- **Advanced Frontend:** Earned the Advanced Frontend Web Development using React JS certificate from the Information Technology Institute. [Certificate](#)
- **Meta Front-End Developer:** Earned the Meta Front-End Developer Professional Certificate on Coursera. [Certificate](#)
- **Codeforces Specialist:** Achieved Specialist rank on Codeforces, demonstrating strong problem-solving skills. [Profile](#)
- **AtCoder Green Rank:** Reached Green Rank with a competitive rating of 1066 on AtCoder. [Profile](#)
- **LeetCode:** Attained a Contest Rating of 1617 (Top 21%) and earned multiple consistency badges (365-Day, 200-Day, 100-Day, 50-Day, and monthly badges). [Profile](#)
- **HackerRank Badges:** Obtained the Gold Badge in **C/C++** and the Gold Badge in Problem Solving. [Profile](#)

Experience

Volunteer HR Committee Lead | [Mish Hackers Team](#)

Jan 2024 – May 2026

- Directed a 25-member HR team, progressing from Member to Head, to drive recruitment and engagement initiatives for a 200 member organization.
- Implemented streamlined processes that enhanced internal communication, cultivated teamwork, and ensured effective cross-functional operations.

Volunteer Mentor | [ICPC Community](#)

July 2023 – Feb 2026

- Mentored participants in competitive programming, providing targeted guidance on algorithmic problem-solving techniques and data structures.
- Facilitated community events and technical workshops to promote knowledge sharing and collaborative learning among members.
